Scenario:
Exploring Global Heritage Sites Through Official World Heritage Data

Awareness

Users become aware of World Heritage Sites and their global importance.

.

Enter

Users access the Heritage Sites dataset or platform.

Engage

In this stage, users move from exploring the dataset to actively interacting with it for deeper insights, contribution, and decision-making..

Exit

The **Exit stage** represents the user completing their interaction with the Heritage Sites dataset after analysis, engagement, or action.

Extend

At this stage, users move beyond browsing and begin meaningful interaction with the heritage data.

Experiencesteps

Seetraveldocumentaries,cultural campaigns, or social media posts about World Heritage Sites.

Analyze maps using **latitude and longitude data**.

- Awareness Trigger
- Curiosity Spark

Visit Heritage Database | Explore Site Details

Deep Data Interaction | Analytical Engagement

Country-wise comparison charts | Decade-wise inscription trends

Real-time status updates | Downloadable research reports

Interactions

What interactions do they have at each step along the way?

- Local community representatives
- People
- Things (Touchpoints)
- Places

Interactive maps | Tourism planners

View Geographic & Risk Data | Need Recognition

Cultural researchers | Community & Institutional Engagement.

Clear danger status indicators | Multilingual accessibility

Educational learning modules. | Community contribution features

Goals&motivations

- Understand global cultural and natural heritage distribution.
- Learn why specific sites were inscribed under UNESCO criteria.
- Identify heritage sites in their country or region.

Cultural & Historical Study | Tourism planning insights

Geographic Visualization | Cultural & Historical Study

Action-Based Engagement | Educational institutions

Summarized site highlights | Mobile-friendly interface

Heritage awareness campaigns | Accessibility enhancements

Positivemoments

- Discovering a heritage site in their own country.
- Learning the historical or environmental significance of a site.
- Identifying newly inscribed heritage sites.

Identifying newly inscribed heritage sites. | Category distribution

People | Places

. Awareness | Access Portal

Conservation progress tracking | Advanced search filters

Data accuracy transparency | Improved filter options

Negativemoments

- Difficulty understanding UNESCO inscription criteria codes.
- Confusion about heritage status (Cultural vs Natural vs Mixed).
- Limited clarity on “In Danger” classification.

Technical issues with maps or filters. | Overwhelming amount of information.

Interactive maps, search filters | heritage dashboards

Explore Site Details | Geographic Analysis

Virtual heritage tours | Interactive timeline visualization

Thematic heritage grouping | Climate impact indicators

Areasofopportunity

- Simplify explanation of UNESCO criteria codes.
- Improve interactive map usability and speed.

Include conservation progress updates. | Offer multilingual support for global users.

Support conservation and preservation efforts. | Use data for tourism planning or academic research.

Improved map usability | Visual data dashboards

Region-wise distribution maps | Category comparison charts

Tourism integration tools | Storytelling-based summaries
