Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	20 february 2026
Team ID	LTVIP2026TMIDS83621
Project Name	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	• Registration through Form • Registration through Gmail • Registration through Linked IN
FR-2	User Confirmation	• Confirmation via Email • Confirmation via OTP
FR-3	User Login	• Login using registered Email and Password • Login using Gmail account • Forgot password functionality • Reset password via email link
FR-4	Heritage Site Management	• Add new heritage site (Admin) • Update heritage site details • Delete heritage site • Upload heritage images
FR-5	Ticket Booking	• Select heritage site • Choose date and number of tickets • Calculate ticket price

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	**Usability**	• Navigation between pages (Home, Login, Dashboard, Booking, Feedback) shall be easy and intuitive. • The system shall support both web and mobile devices (responsive design). • Error messages and validation messages shall be clearly displayed to users. • Users shall be able to complete ticket booking within minimal steps.

NFR-2	**Security**	• The system shall implement secure user authentication (email/password, OTP verification). • Passwords shall be stored in encrypted format in the database. • The system shall use HTTPS protocol for secure communication.
NFR-3	**Reliability**	• The system shall operate without failure during peak usage hours. • Booking and payment transactions shall be processed accurately without data loss. • The system shall maintain transaction logs for recovery purposes. • Backup mechanisms shall be implemented to prevent data loss.
NFR-4	**Performance**	• The system shall load pages within 3–5 seconds under normal conditions. • The system shall support multiple concurrent users (e.g., 500+ users simultaneously). • Search results for heritage sites shall be displayed quickly.
NFR-5	**Availability**	• The system shall be available 24/7 for users. • Scheduled maintenance shall be informed to users in advance.
NFR-6	**Scalability**	• The system shall support increasing number of users without performance degradation. • The system shall be scalable vertically and horizontally as demand increases.
